

Ingeniería de Software I

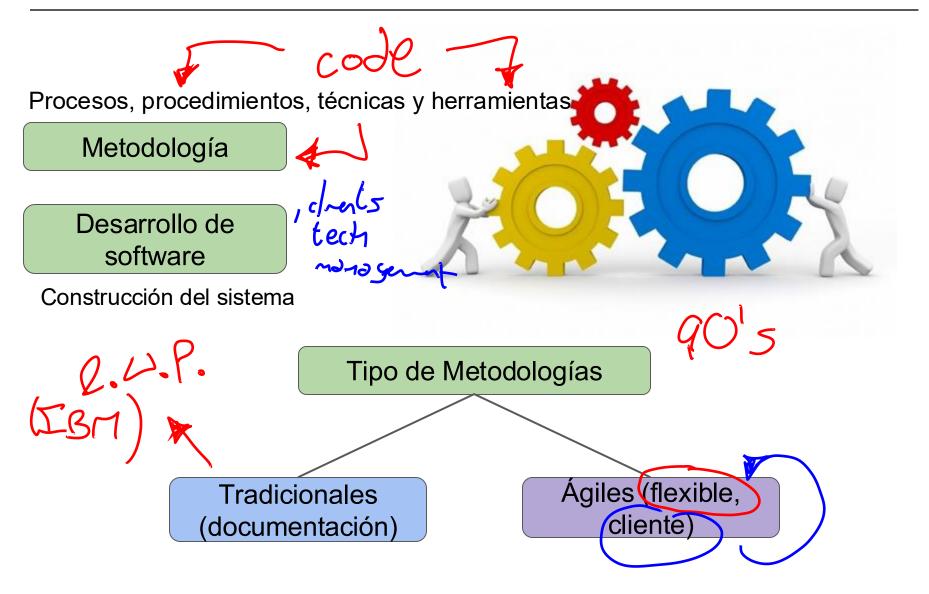

Metodologías Ágiles

P.T.O. & Paid Time-Off

BASE CONCEPTUAL

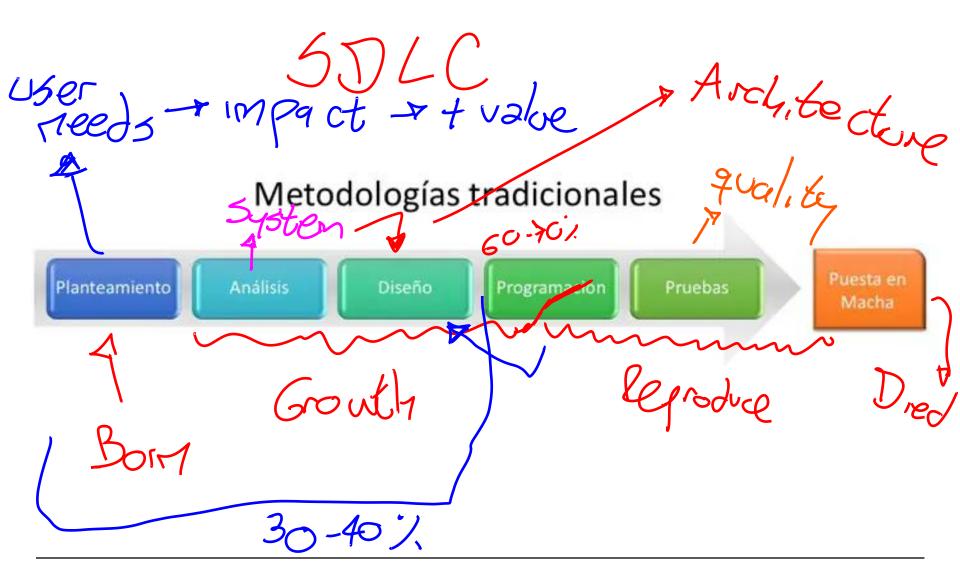

METODOLOGÍA TRADICIONAL

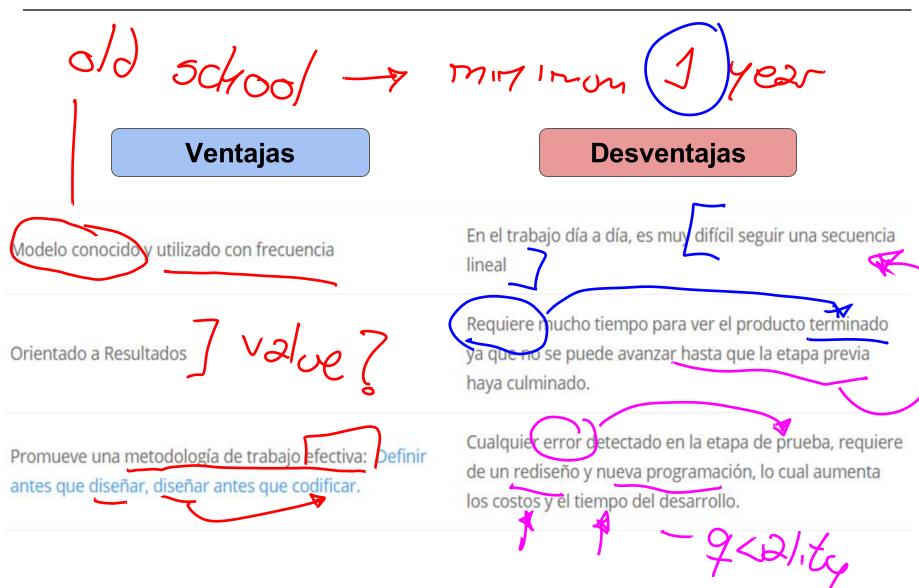

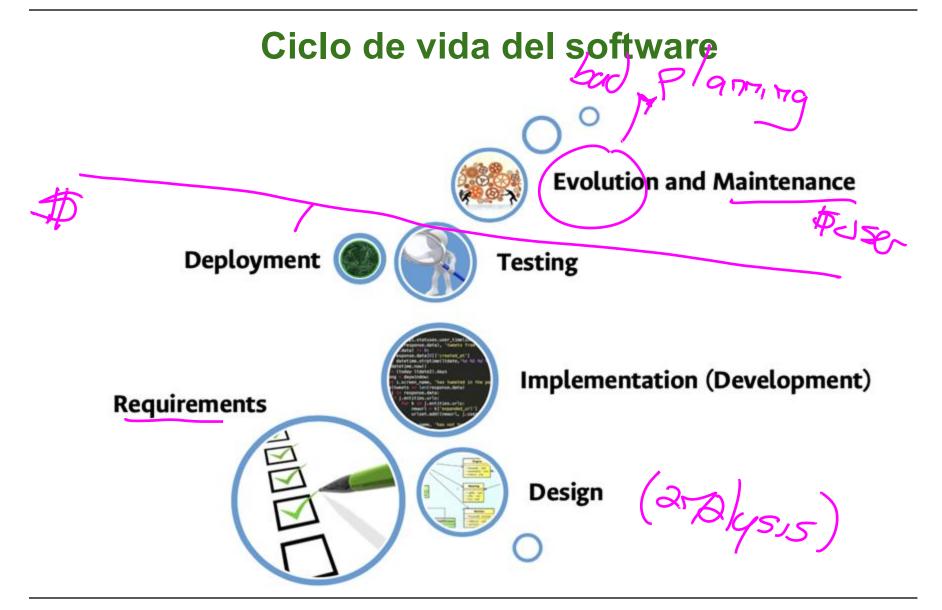

MODELOS

Modelos para abordar el ciclo de vida del software

METODOLOGÍA ÁGIL

Modelo iterativo e incremental

Equipos autoorganizados y multidisciplinarios

Decisiones a corto plazo

Menor documentación

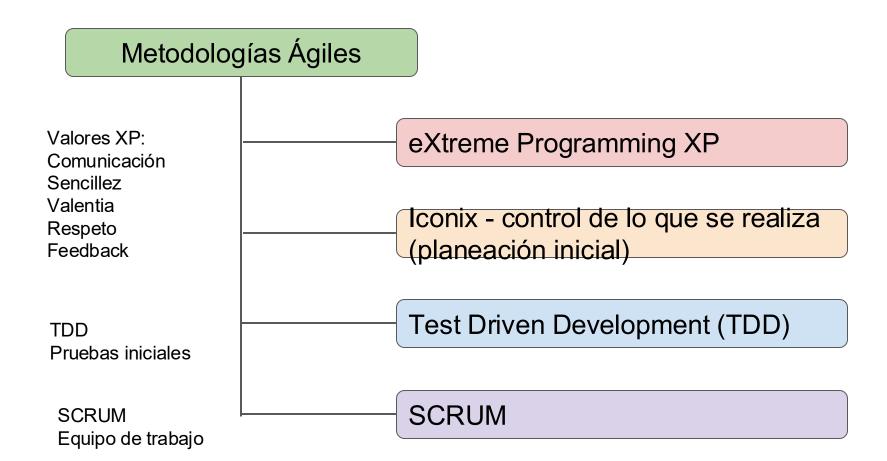

Manifiesto Ágil

Define las directrices, reglas, normas, principios que debe cumplir una metodología para considerarse ágil.

SCRUM

Iterativo, incremental, flexible, ágil, buen equipo de trabajo

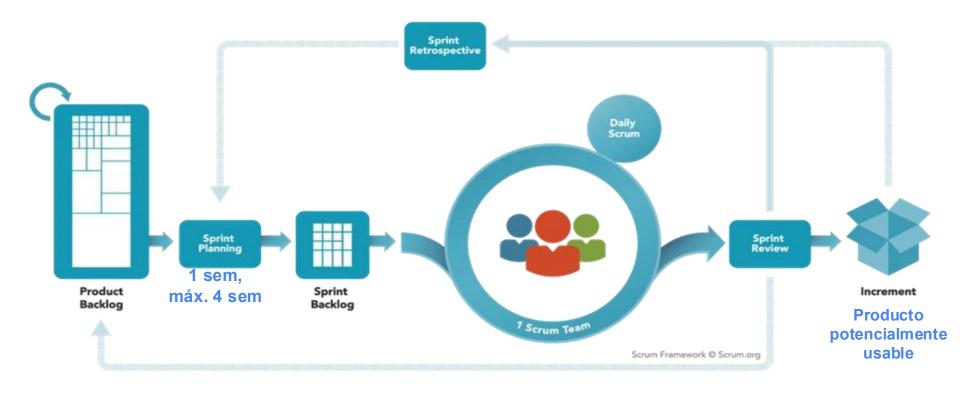

Pilares de SCRUM

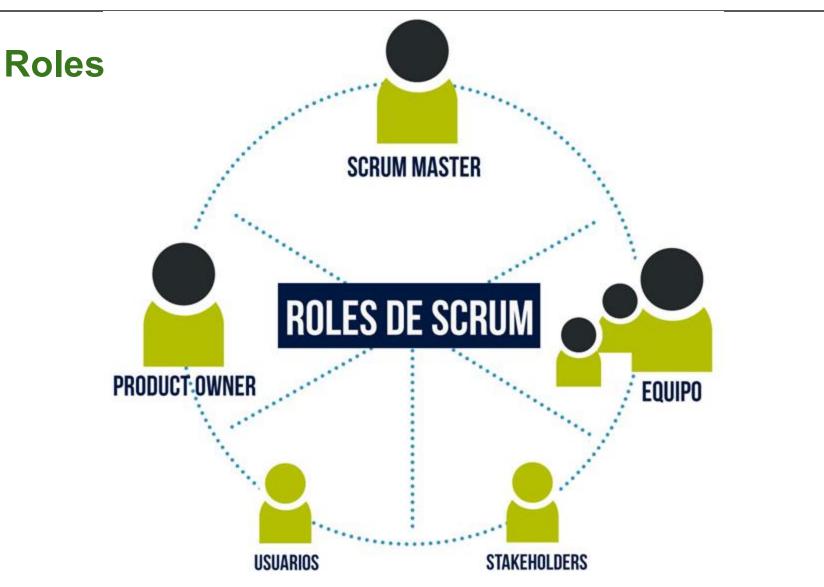

Jerónimo Palacios

Ciclos de un proyecto SCRUM

Artefactos: productos tangibles

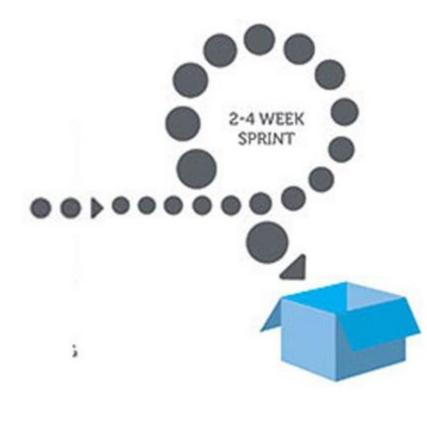

Sprint Backlog

Product Backlog

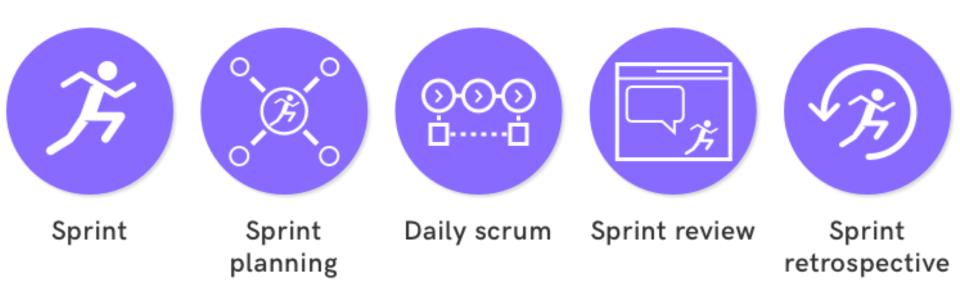

Product Increment

Versión del producto

Eventos
